

Wind Turbine Service Technician

Objectives: As a result of this activity, students will understand the job of a wind turbine service technician as well as the education required to make this their career.

Career kits aim to give students exposure to the job-specific hardware, software, and equipment used in jobs in the renewable energy industry. This kit has the equipment that wind turbine service technicians use to climb wind turbines and work on the generator and other parts of the turbine. Encourage students to try the equipment on, handle the tools, and watch the interviews.

This kit includes:

Climbing harnesses

Lanyards

MORE

USB with interviews with technicians

Factsheet on the career and education requirements
